

Infusion sets

CE 2274

infusion sets with possibility of measuring central venous pressure

Distinctive elements:

- two-channel intake needle with limiting orifice
- cap-secured antibacterial air-filter
- drip chamber with 15 μm fluid filter
- central venous pressure metering scale 0-30 cm H₂O, scale tubing end with
- roller flow regulator with tubing holding
- measuring scale of central venous pressure 0-30cm H₂O
- three-way stopcock
- connector for additional injection
- LUER-LOCK connector with cap

Sterilized with: ETO

Packing:

carton boxes containing 40 pieces

Expiry date: 3 years
